

"Trusted for Quality. Valued for Service."

PVC Injection Molding / Profile Extrusion Compounds

Cary injection molding / profile extrusion compounds are perfect for single and complex profile extrusion and thermoplastic injection molding applications. These compounds have excellent processing characteristics with very low scrap rates. Custom formulations to your specifications are available with short lead times.

Typical Applications:

- Weather Stripping
- Gasketing
- Shoes
- Hose / Tubing

Characteristics include:

- FDA/ NSF
- Medical Class VI
- Clear/ Opaque/ Custom Color Matching
- UV Resistant
- Anti-Microbial
- Low and High Temperature
- Durometer Range 55A-95A
- Specific Gravity Range 1.18 - 1.85 g/cm³
- Abrasion Resistant
- Fuel and Oil Resistant
- Flame Retardant
- Matt / Gloss Finish

**Tell us about your requirements and our experts will make sure
Cary's injection molding / profile extrusion compounds meet your
specifications.**
