

*"Trusted for Quality. Valued for Service."*

## CPE Compounds

Cary's chlorinated polyethylene compounds offer excellent extrusion characteristics through all cable sizes and constructions with very low scrap rates. Our CPE compounds are formulated with outstanding UV, oil and flame resistance properties while maintaining low temperature flexibility. For quantities large or small, Cary will produce your order with the shortest lead time and deliver it on-time.

Superior Processing

Low Scrap Rates

Flame Retardant

LOI - up to 41%

Oil and Chemical Resistance

Deformation Resistance

Excellent Low Temperature Properties

**Tell us about your requirements and our experts will make sure  
Cary's CPE compound meets your specifications.**
